Art Unit: 1773

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

- The title has been amended as follows: the entire title was replaced with the following: "Magnetic Disk with Crosslinked Lubricant Layer and Method of Making Thereof".
- 2. Authorization for this examiner's amendment was given in a telephone interview with Ms. Laura Wanek on March 1, 2006.

The application has been amended as follows:

Claim 43, line 1: the dependency was changed from "claim 17" to "claim 16".

Reasons for Allowance

3. The present claims are deemed allowable over the references of record since the references of record fail to disclose or render obvious a method of making a magnetic disk wherein the source of the far-ultraviolet radiation is disposed with a separation distance of about 5 nm from the disk surface.

While the prior art of record disclose the general concept of using excimer radiation to crosslink a lubricant layer, the prior art of record fails to teach or render obvious a separation distance of about 5 nm. The Examiner notes that it is well known in the art that the intensity of the radiation is proportional to the square of the distance.

Art Unit: 1773

Furthermore, the Examiner notes that the prior art recognizes that the conventional range for using excimer radiation/UV radiation to cure or crosslink a polymer is on the order of 2 – 150 cm (see U.S. Patent No. 5,932,393 to Cunningham et al., col. 39, lines 28 – 57). Given that a decrease from 2 cm to 5 nm is several orders of magnitude and the fact that the intensity would increase by the square of the distance, the Examiner deems that the prior art of record fails to teach or render obvious the claimed separation distance.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin M Bernatz whose telephone number is (571) 272-1505. The examiner can normally be reached on M-F, 9:00 AM - 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney can be reached on (571) 272-1284. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
